=

AirPlay[®]

It has been a few weeks since everyone is talking about AirPlay[®].

Here and there you can see that brandX or brandZ will be the first to introduce AirPlay[®] products to the market.

Over a year ago, Micromega was the first company to launch an AirPlay[®] player called WM-10 with its AirStream[®] technology.

This unit has been appraised internationally and was awarded a «Diapason d'Or» by the french musical magazine Diapason.

Recently, the musical publication "Classica" gave WM10 a "Choc of the year 2010".

OUR AirPlay[®] PRODUCTS

- **AirStream AS-400[®]**
- **AirStream WM-10[®]**

These are the only units in the world using AirPlay[®] technology
